| Horsepower rating of electric<br>motors driven by energy<br>generated at the establishment                         | 231                      | 231                           | 190   | 130              | 2                     | 3                        | -                        | 55                         | 40                           | 34                 | 6   | 1                  | (z) |   |  |

Standard Notes: - Represents zero.

for individual companies. (NA) Not available.

(D) Withheld to avoid disclosing figures

(X) Not applicable.

(Z) Less than one-half of the unit of measure specified.

Figures for fractionating plants are included with those for natural gasoline plants with combination methods of recovery.

(A) Not shown since the difference between shipments and liquids received for such plants primarily reflects changes in finished products and materials inventories.

(B) Figures for other products and services of fractionating plants are included with similar receipts for natural gasoline plants with combination methods of recovery.

Receipts for contract processing of natural gas is not included in the total value of shipments and receipts since it would duplicate, in part, the value of the products produced from such processing.

(C) Not shown since the cost of supplies, purchased fuels and electric energy, contract work, and purchased machinery installed exceeds the capital expenditures.
